Introduction

The Cornish Seal Sanctuary is a charity that rescues and rehabilitates seal pups from around the Cornish Coastline.

Did you know that we've been rescuing sick and injured pups since 1958?! The Sanctuary started in the winter of 1958 when a baby seal, only a few hours old, was washed up on the beach at St Agnes. Ken Jones lived with his wife Mary next to the beach, he picked up the pup and took it back to his small garden.

For many years, he ran a rescue centre for seals, with just one pool, at St Agnes. The news of his work with seals spread, and he received more and more calls about injured seals. Ken realised he needed more room, as the single pool at St Agnes was just not big enough. Ken had to find a larger site to build a permanent rescue centre and was offered land by the beautiful Helford River in Gweek.

Each season, the Sanctuary rehabilitates between 50 to 70 seal pups each costing on average £2,000 to be rehabilitated. The Sanctuary also provides a permanent home to animals that need special care from their team of marine animal experts.

When visiting the Sanctuary, you can experience wonderful marine animals up close and personal and learn all about their individual stories.

There's plenty to learn too! We offer guided tours, school workshops and school holiday clubs. Plus, you can head over to Discovery Cove, mixing learning with play; you can enjoy a variety of activities which are both fun and educational.

Hi! My name's Lily!

**I am the learning buddy for the
Cornish Seal Sanctuary.**

**If you see me in your workbook, I
might have a handy hint for you!**

We Are Family

Seals evolved 15 million years ago!
They are part of the **pinniped** group.

Like humans, seals are mammals so share some of the same characteristics.

How do we know if an animal is a mammal?

Write **three** things that identify mammals in the box below:

1....

2....

3....

Did you know that there are 33 different species of seal in the world?

Seals, Sea Lions and Walrus

In the Pinniped group (seals), there are 3 families:

- True Seal (grey, common)
- Eared Seal (sea lion)
- Walrus

Can you match the pictures to family?

True Seal

Walrus

Eared Seal

Two of a Kind

There are two species of seals found around the UK.

They are Common Seals and Grey Seals.

What are the differences between Common and Grey Seals? We've started the first one for you.

Common Seals

They have 'V' shaped nostrils

Grey Seals

Their nostrils do not meet up

Smaller – Larger

Lighter – Darker

Pups in spring – Pups in winter

Pups born with Swimming Coat – Pups born with white fur

You can see both Common and Grey Seals at The Cornish Seal Sanctuary

Seal Body Parts

Look at the seal. Can you label his body parts using the words below?

flipper

whiskers

tail

ear

nose

eye

A seals' body is designed to help when they swim

Can you fill in the blanks using only the words at the bottom of the page?

1) A seal's nose is kept _____ when they are underwater.

2) A seal's mouth is big; this means they can swallow their fish _____.

3) A seal's whiskers are _____ and they can feel things with them.

4) A seal's eyes are _____ underwater.

5) A seal's front flippers are _____ and lie against their body.

6) A seal's back flippers are _____.

backwards

open

closed

webbed

long

whole

holes

short

What Do You Know About Seals?

Tick the boxes next to the right answers.

1) Food

Seals feed on fish, but also sometimes on something else. What do you think they might feed on?

Crabs

Seaweed

Snails

Worms

Did you know that seals have sharp claws on their flippers?

2) Swimming

Which part of a seal's body is used for swimming?

Head

Tail

Tummy

Flippers

3) Underwater

How long do you think seals usually hold their breath for?

Fifteen Minutes

Three Hours

Five Seconds

One Hour

4) On Land

Which part of the body do seals use the most to move on land?

Head

Tail

Tummy

Back

5) Keeping Warm

What do you think keeps seals warm?

Fat

Skin

Flippers

Bones

6) Males and Females

How can we tell the difference between male and female Grey Seals?

Put the descriptions in the right column.

<i>Males</i>	<i>Females</i>

Big Noses Spotty Tummies Darker Coats
Cream Coloured Bellies

7) Mothers

How old will the females be before they have babies themselves?

1 year old

10 years old

4 years old

2 years old

8) Babies

What time of year do Grey Seals have their babies?

Spring and Summer

Autumn and Winter

9) Mum and Pup

How long will the mother be with her pup before she leaves it to live alone?

3 Days

3 Weeks

3 Months

3 Years

10) Big and Fat

It is important that seal pups are big and fat. How heavy should they be when mum leaves them?

The same as (If a bag of sugar weighs 0.5kg):

10 bags of sugar?

5 bags of sugar?

50 bags of sugar?

100 bags of sugar?

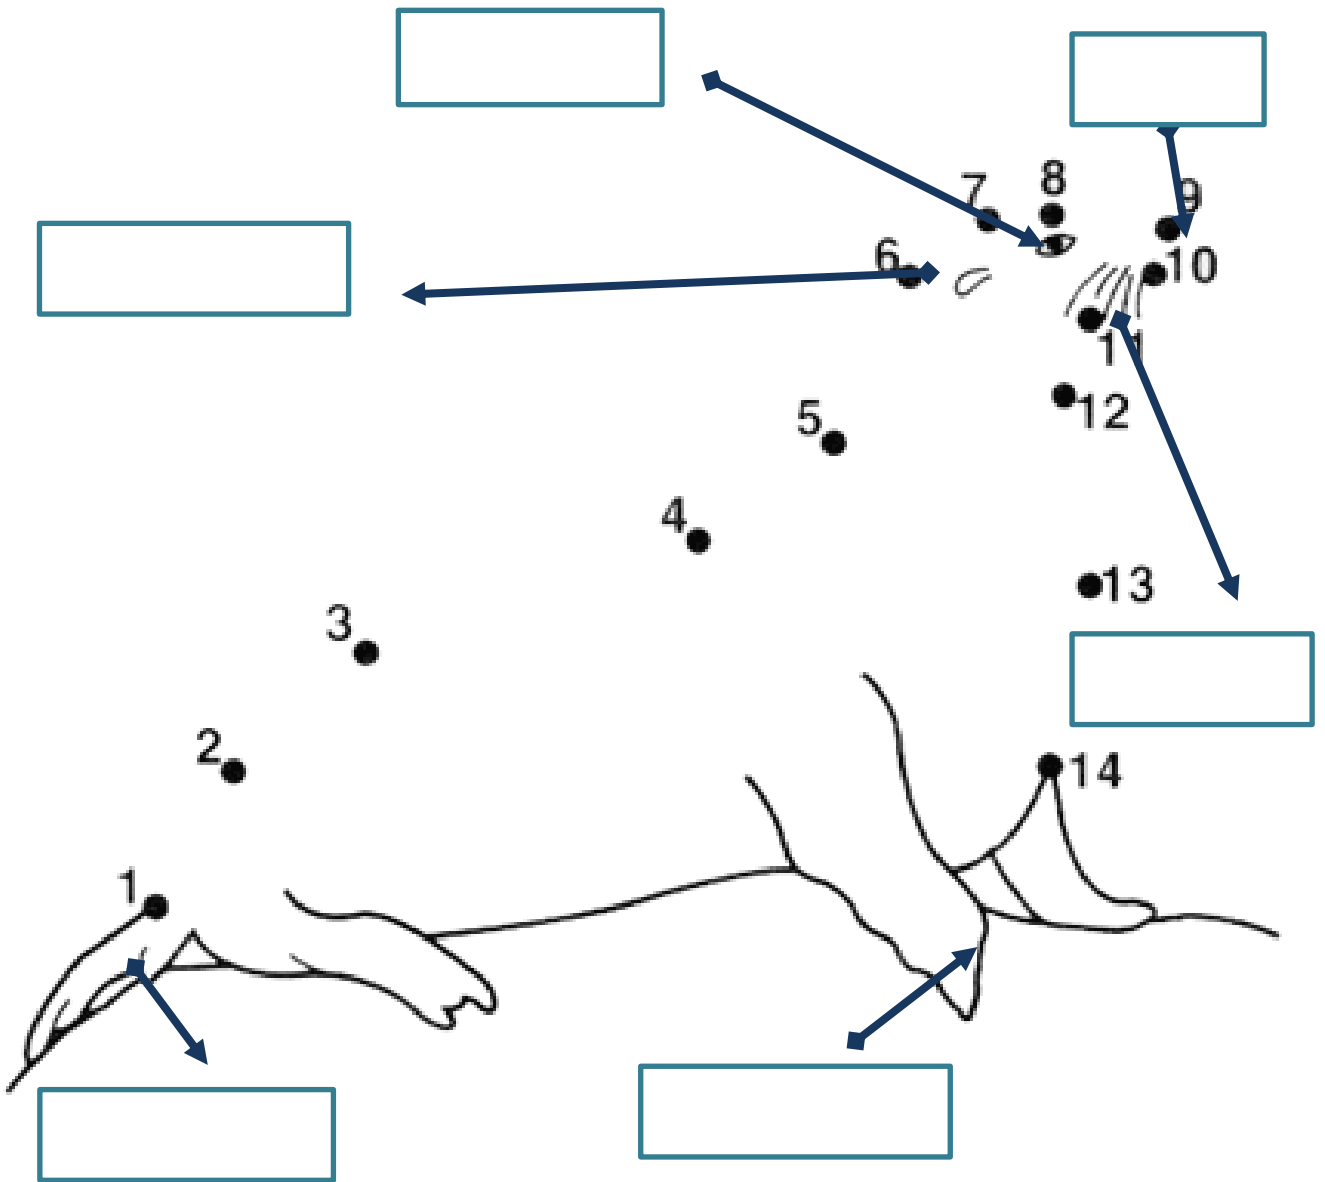

As well as **true seals**, The Cornish Seal Sanctuary is home to **California Sea Lions** and **Southern Sea Lions**!

Why not come and pay them a visit?

Sea Lions

Join the dots to find the sea lion and label the key features.

What kind of sea lion is this?

Answer: _____

How Are They Different?

Can you remember the differences between a seal and a sea lion?

Read the list below and tick if they describe a seal or a sea lion?

	Seals	Sea Lions
Walk on their flippers		
Don't have ear flaps		
Crawl on their tummies		
Live in colder climates		
Have ear flaps		
Live in warmer climates		

Climate is the kind of weather found in a certain place over many years.

An area's climate will affect the kinds of plants and animals that can survive there.

Activity Centre

How many words can you make out of the words **Seal Sanctuary**?

We've done one to start you off!

1. *Class*
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

Learn More at The Cornish Seal Sanctuary

There's plenty more to explore. Combining active learning with fascinating talks and an opportunity to have a close encounter with a variety of animals.

Want to learn more? Calling All Ocean Lovers!

Take part in jam packed sessions during School Holidays and discover all about:

- Seals and Sea Lions and the environment they live in
- Seal pup rescue, rehabilitation and release
- Our resident animals and how we care for them
- Local wildlife
- Marine conservation

Support the Sanctuary

Enjoyed learning with The Cornish Seal Sanctuary?

Did you know that we're a charity?

Every year, we rescue seal pups in need of care from around the coastline. Each pup costs £2,000 to rehabilitate and that doesn't include those that need specific operations. We also care for lots of animals who can't be released.

We are grateful for any donation received. Your money could go a long way to helping our animals get the care they really need.

To help text SEAL 5 to 70085 to make a £5 donation.
Or donate on our website: sealsanctuary.sealifetrust.org

Thank you for your support, we would not be able to do this vital work without you!
